FOREWORD

1. Pakistan Engineering Congress is a multi-disciplinary body of professional engineers established in 1912. It is a non-governmental and non-political organization. Its office bearers are all professional engineers and they work voluntarily during their tenures of office. The cherished objectives of this august body are to:

   i. Promote engineering science and profession.

   ii. Afford its members opportunities for meeting periodically, to discuss, propagate and pursue matters of professional interest relating to engineering and technology developments.

   iii. Have a code of ethics that governs the professional conduct of its members.

   iv. Help promote professional and career interests of engineers.

   v. To promote research and development in engineering.

2. The Congress is playing a Proactive role for facilitation of engineering education through its unique Scholarship Programme of Graduate Engineering Education (Presently 300-Scholarships of Rs. 4000 per month) are being funded and dissemination of engineering knowledge through its Publications containing high quality Technical Papers on diverse engineering issues / projects.

3. At its Diamond Jubilee Celebrations in 1987, the Congress issued a number of Publications, capped by a “Special Publication”, containing a concise background history of achievements and future plans of Technical Departments to highlight and recognize the pivotal role of ‘Engineers’ in planning and establishment of projects of national importance as well as to provide valuable information.

4. The Congress has by the grace of Allah, completed a century of existence and become a centurion. To commemorate this auspicious occasion a centennial session is underway. In addition to other publications, the achievements of leading public / private sector organizations have been compiled in a special volume. The individual presentation documents comprise;
   - The overview of the Organization
   - Past achievements / projects with photographs
   - Ongoing projects of importance
   - Future plans and projects in pipeline

This volume is a landmark centennial publication and is expected to be useful for all professionals.
